From: Brian Rudd
Subject: Geita – 1000 Days LTI Free

The operational team working at our Geita site in Tanzania, have achieved an incredible and monumental milestone of 1000LTI Free Days. This is the first time in Capital Drilling history that an operation has broken the 1000 day LTI Free barrier. This achievement is a testimony to the team's commitment towards safety and proactive drive from management and the operational personnel in maintaining a focus on continual improvements practices.

It is also important to note that the Geita Site was instrumental in the recent external audit conducted on this site mid December, resulting in the Capital Drilling Group receiving formal certification in the following standards:

- ISO9001 Quality Management
- ISO14001 Environmental Management
- OSHAS18001 OH&S Management
- SA8000 Cultural Accountability

I would like to convey my congratulations and well deserved praise to the Geita Team for their efforts, commitment to the companies OHSE systems and practices and recognise the team as ambassadors of the companies cultural foundation representing the standard or performance and commitment to which we promote to our clients and employees.

Regards

Brian Rudd
