

COMPANY OVERVIEW

At Capital Drilling Limited we provide full-service drilling solutions to customers within the minerals industry, focussing on the African markets.

Our drilling services include blast hole, delineation, directional, exploration, grade control and underground drilling.

VALUE FOR CLIENTS

- Drill programs executed on time
- Positive contributor to site safety culture
- Flexible capacity to adjust to changes in drilling programs
- Mechanical availability consistently above 85%
- High drilling productivity rates
- Quality of drilling service reduces overall drill program costs
- Experience operating successfully in the unique conditions typical of remote and challenging environments

FULL-SERVICE DRILLING PROVIDER

Capital Drilling is one of the largest diversified drilling companies globally. Our extensive fleet enables us to provide drilling services across all phases of the mining cycle, from greenfields exploration to mine-sites, in both surface and underground mining operations.

Our reputation is built on an unwavering commitment to safety, delivering professional drilling solutions - even in the most remote and challenging environments - and achieving operational efficiencies for our customers.

We develop long-term relationships with our clients as a result of our consistently professional and productive service delivery. We provide:

- High rig availability and optimal asset performance, while minimizing downtime and maintenance costs via our young fleet and preventative maintenance programs;
- Monitoring and continuous improvement of safety processes and visible safety leadership across all levels of our Company and operations - our excellent safety record is evidence of our team's commitment to a safe workplace;
- Capability to react and adapt quickly to changes in drilling programs through our large fleet capacity;
- A solutions-focussed approach where our experienced teams use their in-country expertise and operational knowledge to add value to all aspects of drilling operations; and
- Thorough communication and reporting processes that deliver ongoing project improvement initiatives.

FULL SERVICE DRILLING SOLUTIONS

A consistently efficient and productive drilling service can only be achieved with quality support, experience and systems.

SAFETY

We have an uncompromising commitment to the occupational health and safety of our employees and others where we work. As such, we have one of the best safety records in the industry.

We expect visible safety leadership across all levels of our company, from our Executive Leadership Team to our drill crews on site and will exceed the most stringent safety requirements. Our numerous safety initiatives, training programs, policies and procedures are designed to ensure all our employees have the knowledge to conduct their work safely. Most importantly we work with our employees to ensure they understand the controls to mitigate any risk and are empowered to act if they are unsafe in their workplace or they identify an unsafe condition or behaviour.

It is our goal at every site we operate to exceed safety requirements and be a positive contributor to the safety culture at the mine. Our maintenance programs ensure all rigs are kept to the highest safety standards.

SUPPORTING LOCAL COMMUNITIES

We recognise the importance of contributing to the local communities in which we operate. We actively employ, train and promote local national labour and work to reduce expat ratios across our business. We invest substantially in training and professional development of our employees and provide the opportunity for national employees to receive internationally accredited qualifications.

In addition, we work closely with our clients to support their local community programs and other corporate social responsibility strategies.

MAINTENANCE

We establish world-class maintenance facilities to achieve high fleet utilisation and invest in the latest equipment for our workshops to keep our drills turning. Regular rebuilds and planned maintenance optimise asset performance and reduce downtime and costs – our fleet is one of the youngest and most reliable in the industry.

TRAINING

Our employees undergo ongoing training across all areas of our drilling operations to ensure competency and a professional service delivery. Training combines site-based practical training together with theoretical and competency-based assessments.

PROFESSIONAL DELIVERY LEADERSHIP

We pride ourselves on being always looking at how we can do something better – so much so that in some cases our clients have adapted our standards as their own. We collect and analyse data to assess performance and implement continuous improvement initiatives.
